NASCA'S REDUCED BUYER'S CHARGE - A FAIR DEAL FOR EVERYONE

Dear Customer,

As you are no doubt aware from our advertisements and previous sales, NASCA took the step last year of reducing the commission rates we charge our consignors for auctioning their rare coins, medals and paper money. In order to do this, we decided to implement a system which has long been customary in Europe; a small charge to the buyer of each lot.

Many around the country were skeptical of our chances of making such a system work in America. They felt that customers would never pay a modest fee for the opportunity to acuqire quality coins at auction. This did not happen. Quite the contrary. Prices realized in our recent sales were fully compatible with those being recorded in other auctions around the country, and we set our share of new record prices. Our consignors were delighted to find such low commission rates, and as a result they have been consigning an ever-increasing flood of superb material to our sales. We, in turn, are enabled to offer choice pieces in nearly every field of collecting to **you,** our bidders - pieces previously sold privately before you had the opportunity to see them.

But - we would not have the pieces to offer if we had to charge the same 20% rates other firms normally impose upon their consignors. Only the buyer's charge allows us to work at these lower commission rates. At the same time, we realized that the system of buyer's charges we tried at first was unwieldy and was causing some confusion to floor bidders. Consequently, we have recently streamlined these charges and, at the same time, **reduced** them still further. As a bidder on any individual lot under $5,000 you now pay only a 5% charge, less than the normal increase of one more bid level; for the really rare and valuable pieces - those above $5,000 - even **that modest charge is reduced** - to a low of only 2%! (As the consignor of such pieces pays only 5%, we are thus able to offer these rarities for a total compensation of only 7%, vastly less than our competitors.

We feel that our new commission structure and our reduced and simplified buyer's charge provides a fair deal for everyone: for our consignors since they need not feel the painful bite of 20-30% rates; for our bidders since we are able to offer increasingly fine and rare pieces for their consideration and competition; and even to ourselves. As a bidder and collector, also, you should bear in mind that some day you will be a **seller,** and that you will then be able to take full advantage of our low commission rates yourself!

We respectfully call your attention to the table of our reduced buyer's charges described in Item #1 of our Terms of Sale. We have designed our commission structure with **you** in mind - both now and for the future. We are certain that you will find the offerings in this sale worthy of your careful consideration and of your strongest bids.

Kindest regards,

Herbert Melnick
Executive Director

If we can be of any further assistance please do not hesitate to call.

A WORD ABOUT OUR BILLING

The auction sale will be closed to bids on 12 noon, Tuesday, June 6, 1978. It will take us approximately 48 hours to then close out the bid book entering all the final bids that were received in the mail and to determine who was the successful bidder on each lot. At that time all of our paperwork is sent to our computer house for processing and is expected that all bills will be mailed **no sooner than Monday, June 12, 1978.** We urgently request you be patient with us and if you do have any questions please call us. We will try to accommodate you as best as we can but it is not really possible for us to tell any bidder who bid on several hundred lots over the phone if you were successful or not.

World Medals From The Wayte Raymond Holdings And Additional Consignors

A SPECIAL SELECTION OF MARRIAGE MEDALS

Wedding and Anniversary medals have long been a popular collecting field. Issued since early Roman days to commemorate the weddings of rulers and prominent citizens, they also came to be used by many middle-class people during the 19th and early 20th Centuries as mementoes of weddings and receptions for the guests. Those portraying members of ruling houses, especially during the years before the 19th Century, are often our best portrait pieces of some of the more obscure relatives of Kings and Queens. We are pleased to offer here a rather wide selection of attractive specimens ranging from the 17th to the 20th Centuries, including several of significant rarity such as the wedding of James III of England, "The Old Pretender."

A FINE SELECTION OF CATHEDRAL MEDALS,

INCLUDING SEVERAL BY THE WIENERS

Of the great monuments of man's architectural skill in Europe, Great Cathedrals form one of the most important and interesting series. These vast structures, erected over many generations at great expense, were then and are today sources of great pride to the cities and nations in which they are located. Some of the very finest medallic die-cutting and designing in history has gone into medals commemorating these superb buildings. Though many other famous medallists have produced Cathedral medals, the outstanding one was surely Jacques Wiener of Belgium who cut medals on most of the famous monuments of Europe during the 1840-1865 period, devising a new style of medallic design to allow superb perspective views of the **interiors** of the buildings as well as the exteriors. We present here a selection of Cathedral medals from many hands, including a fine group of Wiener's pieces, many quite rare.

SPANISH-AMERICAN PROCLAMATION COINS AND MEDALS

During the period of the Spanish Kings of Central and South America, the accession of a new ruler was marked by the production at various mints of special medallic coins or tokens proclaiming him. These served not only as evidence to the new King of the loyalty of his subjects, but served also to familiarize the people with his name, titles and portrait. Many have inscriptions or scenes of a local nature on the reverse. A popular and extensive collecting field. Many of these pieces had the size and weight of regular coinage denominations and they often circulated together with the regular issues. After the end of the Kings, they could be issued for almost any public occasion.

Each medal (except the key to abbreviations) has obverse portrait of one of the Kings, the series running from Pharamond, 417-428 A.D., down to Louis XVIII, struck during his reign. The early portraits, of course, are fictitious, but all are nicely done. The last four-Louis XV, XVI, XVII, and XVIII - are from obverse dies by Gatteaux, DuVivier, Gayrard and DePaulis respectively. Each reverse contains the number of the piece within the series; the ruler's dates; and some incident or action of note during his reign. Though individual pieces from the series are often encountered, **we can find no record of a complete set Ever being offered.** A magnificent medallic tribute to the Kings of France after the fall of Napoleon and the restoration of the Bourbons.

EXCESSIVELY RARE GOLD LINDBERGH MEDAL - POSSIBLY UNIQUE

2374 **1927. Gold medal on Charles A. Lindbergh's crossing of the Atlantic from New York to Paris. 67.5mm. Gold,** 190gms.! Dies by G. Prudhomme; struck at the Paris Mint. **Superb Uncirculated,** in case of issue. Of the almost rarity and interest. **(Photo)** **($5,000-Up)**

Half facing bust of Charles Lindburgh to right. Legend above reads "CHARLES A. LINDBURGH NEW YORK PARIS." Before bust, "AETIS SUAE XXV" (in his 25th year.) Rev. shows a map, centered on the Atlantic Ocean, with Lindburgh's air route traced from New York across over Ireland and down to Paris in France. Parts of Africa, South America, Greenland, and Scandinavia also show on the map. Around the edge, in Latin, "THE SHORES OF OCEAN JOINED FOR THE FIRST TIME BY OARAGE OF WINGS." Date at base in Roman numerals. On edge at 6 o'clock is the mint mark of the Paris Mint followed by "THREE OR." This medal, known in silver and bronze, is missing in gold from all major collections of Lindburgh material known to us **including** the vast Apfelbaum collection. Coming to us on consignment from France, **it is possible that this piece was awarded at the time of the flight to Lindburgh.** (In 1927, 190gms. of gold would not have been lightly distributed to random members of the populace!) As no specimen in gold is known on this side of the ocean, there exists the possiblity (for which we admit we have no documentary evidence) that this specimen was either presented to Lindburgh or intended for such presentation to him. In any event, a medal of most exceptional rarity and beauty, with a superb satiny-matte finish, characteristic of products of the Paris Mint during that era. One of the great highlights of this or any other sale of modern medallic art, this piece should provoke the greatest interest and produce extremely spirited bidding. We are proud to offer such a great rarity to the numismatic community.

Large bust of Sancroft right in his robes of office/busts of seven Bishops with titles in seven circles. The imprisonment, trial and eventual aquittal of Sancroft and the other Bishops on charges of refusing to go along with the Declaration of Religious Indulgence of James II did much to heighten tensions in the period prior to James' deposition. FUNERAL MEDAL OF WILLIAM III

2628 **1702. Funeral Medal on William III. 71mm.** Lead. M.I. II,p. 212, #533. VF, corroded areas. **(Photo)** **($350-Up)**

Obverse: military bust of William III left, laureate; legend in inner circle reads "Guilelmus III.D.G.B.R.AR.PP . . . . BG.", i.e. "William III, By the Grace of God King of Britain, Prince of Orange." Around, 5 groups of three panels each, each set of three panels containing the coronation year, name, and date of death of five Kings of England (including their Birth Sign.) Those on the obverse run from Ecgberth (dated 801) to Stephen (1135-1154). Reverse has, in a wreath surmounted by crown, a lengthy eulogy on William in Dutch and Latin. Beneath the wreath (sceptre and palm across bow) is the date 1700, though with an attempt to correct the last "O" to a "2". Around the central device is another series of five sets of three panels each, as on obverse, this set running from Henry II (1154-1189) to the death of William III in 1702. Curiously, the engraver began numbering Edwards from Edward the Martyr, 975-978, so the one we call Edward I shows up on the medal as Edward III and subsequent Edwards are two numbers out of place. Consequently, Edward V, murdered by Richard III in 1483, shows up as Edward **VII!** An extremely interesting historical medal, obviously cut outside England from the confusion of dates of reigns and ruler numbers.

AN OFFERING OF THE RARE MEDALLIC BIBLE MEDALS ISSUED BY SIR EDWARD THOMASON IN 1829

In 1820, Sir Edward Thomason, Knight Chevalier of the order of Merit of Francis I of Naples and Sicily; Knight Chevalier of the order of the Lion of William of the Netherlands; and Knight Chevalier of the Red Eagle of Prussia, undertook to design and manufacture a most extraordinary series of medals. It was Thomason's dream to depict the Holy Scriptures in medallic form. In 1827, by some inspiration, he decided to produce a unique and novel medallic work to further and promote the glory of God, by impressing the Word of God upon gold, silver and other indestructable metals, with emblematic and symbolic designs, and with a short condensed explanation on the reverse of the medals, and thereby be the first author of a Medallic Bible. He read and reread the Bible and concluded that a minumum of 60 medals would be required to establish a tolerable continuity. He further decided that the designs would be obtained from paintings of the Ancient Masters. He scoured all the musuems in England for appropriate subject matter and, since he acted as ambassador to 8 different governments, had the opportunity to make copies of paintings held abroad.

In the three year period from 1827 to 1830, the dies were cut and a very limited number of sets were produced. The sets were struck in silver, copper, bronze and German silver. **NONE OF THESE SETS WERE SOLD.** They were prepared for presentation to the Monarchs of Europe and Asia. Due to the numismatic importance of these medals, most of these sets have remained in Royal collections. The partial set offered here is in German Silver (55% copper, 25% zinc and 20% nickel).

All medals are 73mm. and are in unusually fine condition for medals 148 years old.

The Extremely Rare Coronation Medal of Awadh

3203 **N.D. (1819-20). Silver medal or accession coin, on the coronation of Ghazi al-din Haidar. 64mm,** pure **silver,** 78. 29 gms. Unsigned. Numismatic Chronicle Vol. 5 (1843) **Ex. Rare. Unc. (Photo)** **($1,000-Up)**
Bust of the new king, crowned, ¾ facing, ornamented fields/ newly created arms of Awadh. Inscriptions **in Persian** around obv. and rev. edges. These translate: (obverse) "The mintage in gold and silver, through the grace of the Lord of all bounty, of Ghazi al-din Haidar, Ghazi (the conqueror of infidels), of the House of the Lion of the Age. In the year one." Reverse: "May thy life, O King, endure for a thousand years; mayst thou live for a thousand years in the protection of God." The piece is cast, the edge is filed. Shows very fine detail. Some very minor air holes along the bottom, and a trivial edge nick at 10:30 obverse identifies the piece. Original color with grey toning. Immaculate surfaces.
This piece was first published in the Numismatic Chronicle, 1843. It next appeared in Numismatic Supplement No. 1 (1904) of the Journal of the Asiatic Society of Bengal, where it was stated that two pieces were known, both in India. JASB 1912, Numismatic Supplement #18, contained Brown's article on the coins of Oude, and listed this piece. A specimen had appeared as Lot 5146 of J. Schulman's White King sale (1905, sold in a group of consecutive lots). The Lord Grantley sale (J. Schulman, 1921) contained a specimen, lot 1232, which brought the high price of 175 florins (plus 10% commission). J. Schulman catalogued these as: "Coronation medal or 7 Rupees." In 1964, Hans Schulman's Brand-Lichtenfels sale contained a specimen, nicked on the face and lightly worn, estimated at $200 (price realized not available). This was described as a "20 Rupees or double Crown." Although the word mintage appears on the piece, the portrait rules out any chance that a monetary purpose was intended. A specimen is also in the British Museum, presumably the 1843 Num. Chron. piece; all seven reported examples are in silver (the specimens in India may be the same as those auctioned later).
Ghazi al-Din Haidar endeared himself to the British government, even loaning money to support their expansion in India. He requested that he be allowed to be King, and as the British considered that such a title would only be honorary (Haidar was then governor), this elevation was allowed. Thus Awadh became a kingdom within the British Empire.
This is one of the strangest, rarest and most desirable pieces in the entire Commonwealth series, and as fine an example as exists.

RARE HOMMA MEDAL

One of the most famous medals in East Asian numismatics. Lt. General Homma Masaharu was the commander of the Japanese forces which took Manila (Unoppposed) and, after initial failure, defeated the U.S.-Filipino forces of McArthur. McArthur later had Homma executed for the large number of POW deaths. The obverse shows a Japanese infantryman gazing across Manila Bay. The reverse has two coconut palm trees and the symbolic 4-star cluster, and a "tanka" (short poem), written and signed by Homma, to the memory of the Japanese soldiers killed in the invasion. Zamora, the medallist, recalled that "somewhere around 1000 pieces" were made. Pesos were used as the only immediately available silver. On early strikes, the edges are reeded and traces of the undertype remain. It was soon decided to heat-treat the peso, and most Homma medals, including those in this sale, have plain edges and no undertype traces. Most of the medals were looped by the medallist and used by Homma as awards. Most known pieces are believed to have been stripped from the buried and unburied dead, and their condition reflects their status as battlefield relics. About 100 pieces are known. This specimen weight 19.4gms. and was never looped. For more inforamtion on this fascinating medal, see the article by Dr. Felix Bertalanffy in the Aug. '77 N1 Bulletin.

Liberty head with stars and ribbon, facing left/commemorative inscription on the change of the college's name from the New York Free Academy to College of the City of New York. Julian states "it is believed that 23 silver and 237 bronze medals were struck." No doubt the high original price kept many pieces from entering numismatic circles (according to an October, 1867 notice in AJN, subscribers were pledged not to sell their bronze medals for less than $7.50).
This exceptional medal, by one of the most skillfull and popular American engravers, is not only a fine educational medal but an outstanding piece of New York City memorabilia. We anticipate very active bidding.

EXCESSIVELY RARE GOLD NATIONAL MEDAL — ONE OF FOUR STRUCK

3812A **1956. Congressional Gold Medal Presented to Surviving Veterans of the Civil War, 70mm. 10½ ounces .999 Fine Gold! By Gilroy Roberts. Uncirculated, two small rubbed areas on obverse, two on reverse, and a few trifling nicks. In case of issue. (Photo)** **($5,000-Up)**
Struck by the U.S. Mint under authority of Public Law 730 - 84th Congress, Chapter 631 - 2nd Session, House Joint Resolution 569 (approved by President Eisenhower on July 18, 1956.) According to information furnished by Eva Adams, Director of the Mint, in 1964, only four of these medals were struck, to be awarded as follows:
1. William A. Lundy, of Crestview, Florida
2. John Salling of Slant, Virginia
3. Walter Williams, of Franklin, Texas
4. Albert Woolson, of Duluth, Minnesota.

Mr. Woolson having died between the time when the Resolution was signed into law and the time the medals were struck, his family requested that his medal be presented to the Sons of Union Veterans of the Civil War, which was done by the Secretary of the Treasury on August 15, 1958. This specimen is now preserved in the Smithsonian Institution. The medal awarded Walter William was offered as Lot 3321 of the 1976 A.N.A. Auction, held in New York and sold by Stacks' at $4,600. According to the best information available to us, the Lundy specimen, here offered, is the fourth known and only the second to be offered for sale (of the three outside the Smithsonian.)
A beautiful and historic piece, both in the event it commemorates and in its own position within the honored history of Congressional Presentation Medals from the U.S. Mint. We are proud to offer this treasure to the numismatic world! **See Cover for Photo.**

¾ facing bust in collar, over oak and laurel branches. "GEORGE WASHINGTON FIRST PRESIDENT OF THE UNITED STATES OF AMERICA"/General on horse to left,* "GENERAL GEORGE WASHINGTON BORN FEBRUARY 22, 1732 DIED DECEMBER 14, 1799". These medals were struck in 1962 from dies found the previous year. Apparently, no originals are known. Although hinted as intended for the 1932 Washington Bicentennial, we note that Koch was active in 1892 (he signed a Columbia Expo, piece, Eglit 337). We would suggest the medal was more likely contemplated as an 1899 Death Centennial commemorative. Struck by Medallic Art Co.? No serial number.

A GROUP OF UNPUBLSIHED, VERY POSSIBLY UNIQUE, CENTENNIAL SO-CALLED DOLLARS

Each of the next five lots has a common reverse, that of HK 60-61. Each is **serially numbered with an incused "1"** following the raised "No" on all medals of this type. It is possible that this matching serial number set of mules was **made for Chapman,** to whom these pieces have been traced.

Four of the pieces are in brass, a metal not recorded for any pieces in the series (except #72, but Fuld's revision of Baker contradicts this listing). Each piece is prooflike Uncirculated with minutest spotting. AU are 38mm and have a reeded edge.

4093 **"1776."** Decl. of Independence. 39mm, tin. Unsigned. Not in HK. AU, slightly crude. **(Photo)** **(——)**
Heraldic eagle, banner reads "PLURIBUS-UNUM", 13 stars above, "LIBERTY AND EQUALITY" below/inscr. within wreath of oak leaves. The style, workmanship- and metal strongly suggest that this is an 1826 issue. Several campaign medals of 1826 bear a resemblance. It could, of course, be a rare, later medal, but the copying of the obverse design from the early Dollar reverse minimizes this possibility. We are photographing this piece in the hope that American medal scholars will be able to learn more about this challenging piece.

Finely engraved equestrian portrait, sword drawn and pointing forward, legend "ANDREW JACKSON"/"THE ADVOCATE OF THE AMERICAN SYSTEM", eagle and shield. DeWitt writes: "Both Bushnell and Satterlee referred to this piece as having been 'carefully' but 'rigidly suppressed' which accounts for its rarity." It is very unusual for DeWitt to comment on rarity. The original envelope (Chapman's) describes as "Very Fine and excessively rare. $20.00." The medal is a nice, clean XF, but with some small nicks on the raised borders, as is common on pewter medals. Virtually the equal of DeWitt's plate.

4233 **1836. On the Napoleonic Spoliation payments to America.** 51mm. Bronze. Dies by **Furst. Nice AU,** once cleaned but retoning, minor edge and field marks. Rare. **(Photo)** **($450-Up)**

Large bust right of Louis Philippe of France/France standing right, foot on globe section, empty scales in extended left hand, facing America (an Indian with fasces) who holds out an olive branch. Between them, Mercury flying toward America carrying a full purse. A marvelous medal on a relatively forgotten episode in American history: Jackson was pushing the French to make repayments for American property seized or destroyed during the Napoleonic Wars, and when the French Parliament tried to refuse he threatened war. A payment was promptly made by the French to avert the war, and Furst seems to have designed this medal to commemorate the event. Most interesting, very rare.

4526 **1860. Stephen A. Douglas. Ferrotype campaign token.** 24mm, gilt brass shell, ferrotype portraits in centers, holed as made. A variety not in DeWitt. **Choice Unc. (Photo)** **($150-Up)**
Ferrotype portrait of Douglas, name printed in a half-circle above his head, shell inscribed "UNION OF THE STATES - 1860"/similar, Herschel V. Johnson, shell inscribed, "THE CONSTITUTION"-1860". Plain edge. This is identical to DeWitt SD1860-41A except that "Douglas portrait number 3" is used. A real prize in this condition.

4527 **1860. Abraham Lincoln. Ferrotype campaign token.** 25mm, gilt brass shell, ferrotype portraits in centers, holed as made. DeWitt A11860-94. **Choice Unc. (Photo) ($150-Up)**
Ferrotype picture of beardless Lincoln, surrounded by metal ring with his name and date/similar, Hannibal Hamlin. As the collecting of photographs is becoming very popular, and as Lincoln "photos" are already so rare and valuable, we expect these are rare political tokens to explode in price. This example is exceptionally nice in that the ferrotypes are well-centered within the shells and the hole does not catch any of the lettering. We expect a record price for the type.

4528 **N.D. (1860). Campaign.** 38mm, copper. By True. DeWitt Al 1860-20, King 16. **Proof restrike.** **($20-Up)**

4539 **1882. Campaign Medal of Gen. James A. Beaver.** 26mm. Copper. By "K." **XF+-AU,** very scarce. **($40-Up)**
Very high relief bust left/in a circle, crossed crutches, date "Aug. 25, 1864," on a clover below "2 A.C." Legend beneath, "The Only Medal He Wears- Won at Reams Station." Beaver was elected Governor of Pennsylvania 4 years later than this medal, so he obviously lost this campaign!

4540 **1884 Grover Cleveland.** 28mm, white metal. (By **Key**). DeWitt. GC 1884-13. Dark **Unc.,** holed. **($15-Up)**

4541 **1888. Harrison.** 38mm, bronzed white metal. DeWitt BH 1888-9. **VF+,** mount removed. **($30-Up)**
